

Original RL policy: exploratory speed $\times$ duty-factor surfaces

Positive mechanical CoT • 12 invalid vertices omitted

Periodicity of realized motion (not χ)

Frozen seed-2 paper policy • flat ground • period 0.48 s • exploratory, one policy • no χ estimates.

CoT shown only with all five widths valid; equal-width aggregation. Periodicity includes all trials.

Walk DF < 0.75 was outside training support. Periodicity does not establish requested gait/DF compliance.
